ALAN CONSULTING ENGINEERING

A photograph of two construction workers in a large industrial building, overlaid with a semi-transparent orange filter. The workers are wearing hard hats and safety vests. The word "MISSION" is centered over the image, flanked by two horizontal white lines.

MISSION

Mission statement

Our main goal in Alan company is to provide services based on the use of the latest technology in the world to provide optimal designs and provide creative and practical solutions for complex customer problems.

To achieve this goal, we have tried to use the services of teams with high expertise and also use the project management system.

Our main goal in projects has been to provide effective consulting services and solve project problems with the least cost and time.

We are always committed to human capital as the main force of development.

Macro strategies

Our ultimate goal of establishing the company is to create a bridge between academics and industry to participate in sustainable development, both at the local and national level.

We believe that professional ethics and high expertise are the primary elements of sustainable development. Therefore, the company has considered both activities in the past 20 years, and in the future, it will take on a greater role by adding innovation.
